ClinicalKey Monthly Product Usage Report: June - 2020

NKP Salve Institute of Medical Sciences and Research Centre

Glossary

Term	Description
Usage Events	All usage for Clinical Key (CK) is tracked as "events" - the traditional web analytics metric "pageviews" is not directly applicable to CK due to the advanced nature of the web application. Most interactions with users are accomplished without reloading the browser page. Currently, the following usage events are available in reports and are categorized as "DISCOVERY", "CONTENT", or "ADVANCED TOOL" events.
Discovery Usage	Usage events that are related to the discovery of content; currently comprised of "Searches" and "Browses."
Searches	A count of events when a user initiates a new search or further refines a search; currently includes the submission of any query to CK as well as the refinement of search results using the faceting tools (by content type or content specialty) located on the left side of the search results page.
Browses	A count of events when a user initiates a browse through content by content type (Books, Journals, Practice Guidelines, Patient Education, etc).
Content Usage	Usage events that are related to the consuming of content; currently comprised of "Content Views," "PDF Downloads," and "Content Prints."
Content Views	A count of events when a user makes a full HTML view of content or views an image, video, or audio multimedia element. Note this metric may be higher than COUNTER HTML for a particular content type, since COUNTER does not include the image, video, or audio elements.
PDF Downloads	A count of events when a user initiates a download of content as a PDF file to his or her local system.
Content Prints	A count of events when a user initiates printing of content.
Advanced Tool Usage	Usage events that are related to features on the site for storing, retrieving, or integrating content into presentations; currently comprised of "Saved Content", "Presentation Maker", and "Email Content" elements. Note that individual registration is a prerequisite for these events.
Saved Content Adds	A count of events when a user adds a content element to his or her menu.
Saved Content Opens	A count of events when a user retrieves a content element from his or her menu.
PPT Maker Adds	A count of events when a user adds a content image to his or her presentation maker.
PPT Exports	A count of events when a user exports PPT maker content from his or her presentation maker.

Term	Description
Email Content	A count of events when a user uses a citation for drug monographs, images, and patient education materials referencing the copyright holder, the title of the material, the type of material it is, a reference to ClinicalKey with the appropriate URL, and the date it was viewed.
Topic Pages Accessed	Topic Pages are a feature in ClinicalKey designed to deliver synthesized overviews for fast, concise answers. Topic Pages contain information about risk factors, clinical manifestations, treatments and more, as well as links to specialty-specific answers and related drugs. A link out to search results is included when deeper evidence is needed. Currently, the following Topic Pages metrics are available in reports "Topic Pages View" and "Topic Page Term".
Topic Page View	A count of the number of topic pages accessed on the ClinicalKey application.
Topic Page Term	A count of the number of concepts that resulted in a Topic Page rendering.

ClinicalKey Monthly Product Usage Report: December - 2015

ClinicalKey Monthly Product Usage Report: December - 2015

N K P Salve Institute Of Medical Sciences and Research Centre

Glossary

Term	Description
Usage Events	All usage for Clinical Key (CK) is tracked as "events" - the traditional web analytics metric "pageviews" is not directly applicable to CK due to the advanced nature of the web application. Most interactions with users are accomplished without reloading the browser page. Currently, the following usage events are available in reports and are categorized as "DISCOVERY", "CONTENT", or "ADVANCED TOOL" events.
Discovery Usage	Usage events that are related to the discovery of content; currently comprised of "Searches" and "Browses."
Searches	A count of events when a user initiates a new search or further refines a search; currently includes the submission of any query to CK as well as the refinement of search results using the faceting tools (by content type or content specialty) located on the left side of the search results page.
Browses	A count of events when a user initiates a browse through content by content type (Books, Journals, Practice Guidelines, Patient Education, etc).
Content Usage	Usage events that are related to the consuming of content; currently comprised of "Content Views," "PDF Downloads," and "Content Prints."
Content Views	A count of events when a user makes a full HTML view of content or views an image, video, or audio multimedia element.
PDF Downloads	A count of events when a user initiates a download of content as a PDF file to his or her local system.
Content Prints	A count of events when a user initiates printing of content.
Advanced Tool Usage	Usage events that are related to features on the site for storing, retrieving, or integrating content into presentations; currently comprised of "Saved Content", "Presentation Maker", and "Email Content" elements. Note that individual registration is a prerequisite for these events.
Saved Content Adds	A count of events when a user adds a content element to his or her menu.
Saved Content Opens	A count of events when a user retrieves a content element from his or her menu.
PPT Maker Adds	A count of events when a user adds a content image to his or her presentation maker.
PPT Exports	A count of events when a user exports PPT maker content from his or her presentation maker.
Email Content	A count of events when a user uses a citation for drug monographs, images, and patient education materials referencing the copyright holder, the title of the material, the type of material it is, a reference to ClinicalKey with the appropriate URL, and the date it was viewed.
Topic Pages Accessed	Topic Pages are a feature in ClinicalKey designed to deliver synthesized overviews for fast, concise answers. Topic Pages contain information about risk factors, clinical manifestations, treatments and more, as well as links to specialty-specific answers and related drugs. A link out to search results is included when deeper evidence is needed. Currently, the following Topic Pages metrics are available in reports "Topic Pages View" and "Topic Page Term".
Topic Page View	A count of the number of topic pages accessed on the ClinicalKey application.
Topic Page Term	A count of the number of concepts that resulted in a Topic Page rendering.

Glossary

Term	Description
Usage Events	All usage for Clinical Key (CK) is tracked as "events" - the traditional web analytics metric "pageviews" is not directly applicable to CK due to the advanced nature of the web application. Most interactions with users are accomplished without reloading the browser page. Currently, the following usage events are available in reports and are categorized as "DISCOVERY", "CONTENT", or "ADVANCED TOOL" events.
Discovery Usage	Usage events that are related to the discovery of content; currently comprised of "Searches" and "Browses."
Searches	A count of events when a user initiates a new search or further refines a search; currently includes the submission of any query to CK as well as the refinement of search results using the faceting tools (by content type or content specialty) located on the left side of the search results page.
Browses	A count of events when a user initiates a browse through content by content type (Books, Journals, Practice Guidelines, Patient Education, etc).
Content Usage	Usage events that are related to the consuming of content; currently comprised of "Content Views," "PDF Downloads," and "Content Prints."
Content Views	A count of events when a user makes a full HTML view of content or views an image, video, or audio multimedia element. Note this metric may be higher than COUNTER HTML for a particular content type, since COUNTER does not include the image, video, or audio elements.
PDF Downloads	A count of events when a user initiates a download of content as a PDF file to his or her local system.
Content Prints	A count of events when a user initiates printing of content.
Advanced Tool Usage	Usage events that are related to features on the site for storing, retrieving, or integrating content into presentations; currently comprised of "Saved Content", "Presentation Maker", and "Email Content" elements. Note that individual registration is a prerequisite for these events.
Saved Content Adds	A count of events when a user adds a content element to his or her menu.
Saved Content Opens	A count of events when a user retrieves a content element from his or her menu.

Term	Description
PPT Maker Adds	A count of events when a user adds a content image to his or her presentation maker.
PPT Exports	A count of events when a user exports PPT maker content from his or her presentation maker.
Email Content	A count of events when a user uses a citation for drug monographs, images, and patient education materials referencing the copyright holder, the title of the material, the type of material it is, a reference to ClinicalKey with the appropriate URL, and the date it was viewed.
Topic Pages Accessed	Topic Pages are a feature in ClinicalKey designed to deliver synthesized overviews for fast, concise answers. Topic Pages contain information about risk factors, clinical manifestations, treatments and more, as well as links to specialty-specific answers and related drugs. A link out to search results is included when deeper evidence is needed. Currently, the following Topic Pages metrics are available in reports "Topic Pages View" and "Topic Page Term".
Topic Page View	A count of the number of topic pages accessed on the ClinicalKey application.
Topic Page Term	A count of the number of concepts that resulted in a Topic Page rendering.

ClinicalKey Monthly Product Usage Report: December - 2017

ClinicalKey Usage Statistics

Aggregate discovery usage metrics (searches and browses) have been trending lower than expected in 2017. Upon calibrating with a secondary data source, we see that these metrics have actually increased platform-wide. This issue appears to have affected customer-level discovery metrics as well, causing an artificial low trend. Discovery usage metrics will be suppressed from the report until the issue is resolved.

Glossary

Term	Description
Usage Events	All usage for Clinical Key (CK) is tracked as "events" - the traditional web analytics metric "pageviews" is not directly applicable to CK due to the advanced nature of the web application. Most interactions with users are accomplished without reloading the browser page. Currently, the following usage events are available in reports and are categorized as "DISCOVERY", "CONTENT", or "ADVANCED TOOL" events.
Discovery Usage	Usage events that are related to the discovery of content; currently comprised of "Searches" and "Browses."
Searches	A count of events when a user initiates a new search or further refines a search; currently includes the submission of any query to CK as well as the refinement of search results using the faceting tools (by content type or content specialty) located on the left side of the search results page.
Browses	A count of events when a user initiates a browse through content by content type (Books, Journals, Practice Guidelines, Patient Education, etc).
Content Usage	Usage events that are related to the consuming of content; currently comprised of "Content Views," "PDF Downloads," and "Content Prints."
Content Views	A count of events when a user makes a full HTML view of content or views an image, video, or audio multimedia element. Note this metric may be higher than COUNTER HTML for a particular content type, since COUNTER does not include the image, video, or audio elements.
PDF Downloads	A count of events when a user initiates a download of content as a PDF file to his or her local system.
Content Prints	A count of events when a user initiates printing of content.
Advanced Tool Usage	Usage events that are related to features on the site for storing, retrieving, or integrating content into presentations; currently comprised of "Saved Content", "Presentation Maker", and "Email Content" elements. Note that individual registration is a prerequisite for these events.
Saved Content Adds	A count of events when a user adds a content element to his or her menu.
Saved Content Opens	A count of events when a user retrieves a content element from his or her menu.

Term	Description
PPT Maker Adds	A count of events when a user adds a content image to his or her presentation maker.
PPT Exports	A count of events when a user exports PPT maker content from his or her presentation maker.
Email Content	A count of events when a user uses a citation for drug monographs, images, and patient education materials referencing the copyright holder, the title of the material, the type of material it is, a reference to ClinicalKey with the appropriate URL, and the date it was viewed.
Topic Pages Accessed	Topic Pages are a feature in ClinicalKey designed to deliver synthesized overviews for fast, concise answers. Topic Pages contain information about risk factors, clinical manifestations, treatments and more, as well as links to specialty-specific answers and related drugs. A link out to search results is included when deeper evidence is needed. Currently, the following Topic Pages metrics are available in reports "Topic Pages View" and "Topic Page Term".
Topic Page View	A count of the number of topic pages accessed on the ClinicalKey application.
Topic Page Term	A count of the number of concepts that resulted in a Topic Page rendering.

ClinicalKey Monthly Product Usage Report: December - 2018

N K P Salve Institute Of Medical Sciences and Research Centre

Glossary

Term	Description
Usage Events	All usage for Clinical Key (CK) is tracked as "events" - the traditional web analytics metric "pageviews" is not directly applicable to CK due to the advanced nature of the web application. Most interactions with users are accomplished without reloading the browser page. Currently, the following usage events are available in reports and are categorized as "DISCOVERY", "CONTENT", or "ADVANCED TOOL" events.
Discovery Usage	Usage events that are related to the discovery of content; currently comprised of "Searches" and "Browses."
Searches	A count of events when a user initiates a new search or further refines a search; currently includes the submission of any query to CK as well as the refinement of search results using the faceting tools (by content type or content specialty) located on the left side of the search results page.
Browses	A count of events when a user initiates a browse through content by content type (Books, Journals, Practice Guidelines, Patient Education, etc).
Content Usage	Usage events that are related to the consuming of content; currently comprised of "Content Views," "PDF Downloads," and "Content Prints."
Content Views	A count of events when a user makes a full HTML view of content or views an image, video, or audio multimedia element. Note this metric may be higher than COUNTER HTML for a particular content type, since COUNTER does not include the image, video, or audio elements.
PDF Downloads	A count of events when a user initiates a download of content as a PDF file to his or her local system.
Content Prints	A count of events when a user initiates printing of content.
Advanced Tool Usage	Usage events that are related to features on the site for storing, retrieving, or integrating content into presentations; currently comprised of "Saved Content", "Presentation Maker", and "Email Content" elements. Note that individual registration is a prerequisite for these events.
Saved Content Adds	A count of events when a user adds a content element to his or her menu.
Saved Content Opens	A count of events when a user retrieves a content element from his or her menu.
PPT Maker Adds	A count of events when a user adds a content image to his or her presentation maker.
PPT Exports	A count of events when a user exports PPT maker content from his or her presentation maker.

Term	Description
Email Content	A count of events when a user uses a citation for drug monographs, images, and patient education materials referencing the copyright holder, the title of the material, the type of material it is, a reference to ClinicalKey with the appropriate URL, and the date it was viewed.
Topic Pages Accessed	Topic Pages are a feature in ClinicalKey designed to deliver synthesized overviews for fast, concise answers. Topic Pages contain information about risk factors, clinical manifestations, treatments and more, as well as links to specialty-specific answers and related drugs. A link out to search results is included when deeper evidence is needed. Currently, the following Topic Pages metrics are available in reports "Topic Pages View" and "Topic Page Term".
Topic Page View	A count of the number of topic pages accessed on the ClinicalKey application.
Topic Page Term	A count of the number of concepts that resulted in a Topic Page rendering.

ClinicalKey Monthly Product Usage Report: December - 2019

NKP Salve Institute of Medical Sciences and Research Centre

If you have any questions regarding this report, or would like more information, please contact your Elsevier representative.

ClinicalKey Usage Statistics

Note: There was a ClinicalKey PDF downloads data outage for all content types from May 15th to June 3rd which may cause PDF downloads to look lower than expected. There was a partial data collection outage for ClinicalKey from July 15 to July 26th. The impact to reported usage data will vary by customer.

Glossary

Term	Description
Usage Events	All usage for Clinical Key (CK) is tracked as "events" - the traditional web analytics metric "pageviews" is not directly applicable to CK due to the advanced nature of the web application. Most interactions with users are accomplished without reloading the browser page. Currently, the following usage events are available in reports and are categorized as "DISCOVERY", "CONTENT", or "ADVANCED TOOL" events.
Discovery Usage	Usage events that are related to the discovery of content; currently comprised of "Searches" and "Browses."
Searches	A count of events when a user initiates a new search or further refines a search; currently includes the submission of any query to CK as well as the refinement of search results using the faceting tools (by content type or content specialty) located on the left side of the search results page.
Browses	A count of events when a user initiates a browse through content by content type (Books, Journals, Practice Guidelines, Patient Education, etc).
Content Usage	Usage events that are related to the consuming of content; currently comprised of "Content Views," "PDF Downloads," and "Content Prints."
Content Views	A count of events when a user makes a full HTML view of content or views an image, video, or audio multimedia element. Note this metric may be higher than COUNTER HTML for a particular content type, since COUNTER does not include the image, video, or audio elements.
PDF Downloads	A count of events when a user initiates a download of content as a PDF file to his or her local system.
Content Prints	A count of events when a user initiates printing of content.
Advanced Tool Usage	Usage events that are related to features on the site for storing, retrieving, or integrating content into presentations; currently comprised of "Saved Content", "Presentation Maker", and "Email Content" elements. Note that individual registration is a prerequisite for these events.
Saved Content Adds	A count of events when a user adds a content element to his or her menu.
Saved Content Opens	A count of events when a user retrieves a content element from his or her menu.

Term	Description
PPT Maker Adds	A count of events when a user adds a content image to his or her presentation maker.
PPT Exports	A count of events when a user exports PPT maker content from his or her presentation maker.
Email Content	A count of events when a user uses a citation for drug monographs, images, and patient education materials referencing the copyright holder, the title of the material, the type of material it is, a reference to ClinicalKey with the appropriate URL, and the date it was viewed.
Topic Pages Accessed	Topic Pages are a feature in ClinicalKey designed to deliver synthesized overviews for fast, concise answers. Topic Pages contain information about risk factors, clinical manifestations, treatments and more, as well as links to specialty-specific answers and related drugs. A link out to search results is included when deeper evidence is needed. Currently, the following Topic Pages metrics are available in reports "Topic Pages View" and "Topic Page Term".
Topic Page View	A count of the number of topic pages accessed on the ClinicalKey application.
Topic Page Term	A count of the number of concepts that resulted in a Topic Page rendering.
