## 'Injection model' to ease job of dental students

Patients To Get Optimal Relief From Pain

Aditya Deshpande  
www.vspmdentalcollege.com

The model was prepared in a laboratory and is a continuing medical education programme at VSPM Dental College.

Patients will get optimal relief from pain by using a new model of dental injection, developed by a team of dental students and faculty members at VSPM Dental College, Pune. The model, which is a 3D injection model, is designed to help dental students understand the anatomy of the jaw and the location of the injection site. The model is made of a soft material and is easy to use. It is a great tool for teaching and learning. The model is also a great tool for patients. It helps them understand the procedure and the location of the injection site. The model is a great tool for both students and patients.

## 3D Printing: Advanced tool for Medical and Dental:

Department of Prosthodontic and crown and bridge at VSPM Dental college and Research Centre had organized guest lecture on "3D Printing: Advanced tool for Medical and Dental" on 11<sup>th</sup> January 2018

From its humble beginnings in the late 1980s, through to the global force that it is today, the capabilities of 3D printing technology have expanded dramatically, to establish itself as an attractive manufacturing solution for prototyping and production. Conferring advantages such as shorter lead times, reduced waste and opportunity for mass customisation, the potential of 3D printing was quickly realised and has gone from strength to strength since. One of the key industries to have successfully leveraged these advantages is the medical and dental industry.

Mr. Abhijit Raut, Professor, Department of Mechanical Engineering, G.H. Rasoni College of Engineering, Nagpur had shared the knowledge about 3D printing and their uses in dentistry and medical field.

## Dental photography workshop at VSPM dental college and research centre, Nagpur

Photographs are symbolic of memories and with the advent of digital photography it has become easier to collect them in a mere second. Digital photography has today, quite sure, penetrated into all segments of life, providing new facts and perceptions in the field of science, medicine, industry, fashion, arts and dentistry as well.

The department of pediatric and preventive dentistry, VSPMDCRC conducted a one day workshop on dental photography on 19<sup>th</sup> April 2018. Dr. Mayur Davda who heads the Dental Photography School, Mumbai along with Dr. Devendra Naggal, Professor in the department with more than 10 years' experience in photography were the resource faculties for the event. The program was inaugurated by Dean, Dr. Usha Radke Madam who emphasized the importance of photography in all specializations of dentistry. The workshop included lectures and demonstrations with DSLR cameras for the participants. Participants had the opportunity to interact with the speakers and take extra oral and intra oral pictures alongside. The program was well received and attended by over 40 delegates including staff members, post graduate students and interns who graduated from mobile photography to DSLR lens with confidence. As rightly said, "A picture says more than a thousand words", the workshop definitely enhanced participants skills necessary to incorporate high quality standardised digital photography to everyday dental practice. The staff members and postgraduate students worked hard for the success of the event.

नागपूर : जगभरातील सर्व देशांमध्ये दातांशी संबंधित अद्ययावत तंत्रज्ञान उपलब्ध होत आहे. यात नव्या संशोधनाची भर पडत आहे. या संपूर्ण ज्ञानाचे आदान-प्रदान होत आहे. परिणामी, अद्ययावत उपचाराच्या सुविधा उपलब्ध होत आहेत. यामुळे भविष्यात जगभरातील रुग्णांना एकसमान दातांचे अद्ययावत उपचार उपलब्ध केल्या जाऊ शकतील, असा सूर मॅक्सिलोफेशियल सर्जरीवरील परिषदेच्या उद्घाटनप्रसंगी उपस्थित व्यक्तींचा होता.

असोसिएशन ऑफ ओरल अँड मॅक्सिलोफेशियल सर्जन्स ऑफ इंडियाच्यावतीने तीन दिवसीय 'क्रॅनिओ व मेक्सिलोफेशियल सर्जरी' परिषदेला गुरुवारपासून सुरुवात झाली. उद्घाटन भारतीय दंत चिकित्सा परिषदेचे अध्यक्ष डा. दिव्येंद्र मुजुमदार यांच्या हस्ते झाले. यावेळी मॅक्सिलोफेशियल सर्जन्सच्या संघटनेचे आंतरराष्ट्रीय अध्यक्ष प्रा. डॉ. हुलिओ असेरो,

### अमेरिकेसारखेच भारतातही उपचार

अमेरिकेच्या एका नामांकित विद्यापीठाचे कुलगुरु घाली इलियास घाली म्हणाले की, अमेरिकाएवढेच अद्ययावत उपचार भारतातही होतात. दंत उपचाराला घेऊन दोन देशांची तुलना करणे योग्य नाही. भारतात मुखाच्या कर्करुग्णांची संख्या जास्त आहे. अमेरिकेत इतर दंतरुग्ण जास्त आढळतात. त्यामुळे भौगोलिक गरजेनुरूप संबंधित देशात या क्षेत्राची प्रगती होत आहे.

संघटनेच्या आंतरराष्ट्रीय शैक्षणिक समितीचे प्रमुख प्रा. डॉ. मॅनलिओ गॅली, परिषदेचे आयोजन अध्यक्ष डॉ. रामक्रिष्ण शेणॉय, सचिव डॉ. अभय दातारकर आदी उपस्थित होते. या परिषदेला भारतासह जगातील १३ देशांतून प्रतिनिधी सहभागी झाले आहेत.

प्रा. डॉ. हुलिओ असेरो म्हणाले, चेहऱ्याच्या चिद्रूपतेवर मॅक्सिलोफेशियल सर्जरी वरदान ठरली आहे. यासंदर्भात आंतरराष्ट्रीय स्तरावरील युरोप, अमेरिका, जपान, चीन, स्पेन, ब्राझील, भारतासह अनेक देशात बोच नवनवीन उपचार उपलब्ध आहेत. बहुसंख्य ठिकाणी सुरु असलेल्या संशोधनाचे, कौशल्याचे आदान-प्रदानही होत आहे. या

प्रक्रियेतून सर्व देशांतून दंतरुग्णांना अद्ययावत उपचार भविष्यात मिळेल, असेही ते म्हणाले. प्रा. डॉ. मॅनलिओ गॅली म्हणाले, जगाच्या विविध देशामधील दंत अभ्यासक्रमात एकवाक्यता नाही. यामुळे हे सर्व अभ्यासक्रम अद्ययावत करून ते एकसमान करण्याचे प्रयत्न सुरु आहेत. त्याकरिता जगभरातील मॅक्सिलोफेशियलच्या संघटनांना एकत्र आणण्यात आले आहेत.

या संघटनांना भारतीय दंत परिषदेकडूनही मदत मिळत आहे, असेही ते म्हणाले. या परिषदेच्या आयोजनासाठी डॉ. शेणॉय, डॉ. दातारकर यांच्यासह डॉ. रवी दांडे, डॉ. नीरज खरे, डॉ. मधुमती धावडे, डॉ. आर.एम. चोरले परिश्रम घेत आहेत.

MAXILLOFACIAL defects result from loss of dental faculty from the jaws (nose, ear, eye, or any combination of these) due to cancer surgeries, trauma or birth defects.

Such patients are often affected both psychologically as well as socially. An artificial prosthesis can restore their lost parts and restore their confidence and bring them back to near normal life.

However, this task is not easy. It requires many specialists, mostly multi-disciplinary and time. In front such patients, the dental training career of excellence has been set up in the name of Dr. Sree.

Centre for Maxillofacial Rehabilitation has started functioning at VSPM Dental College and Research Centre.

The centre is headed by leading maxillofacial prosthodontists of our country. It was put forth by Dr. Anil Desai, Secretary, VSPM Academy of Higher Education.

In the initiative, over 100 maxillofacial rehabilitation patients, which is one of the kind in Maharashtra and in Maharashtra was inaugurated recently. Dr. Himanshu Arora, President, Indian Prosthodontic Society, Dr. Parikshit Chaudhary, Director, VSPM Hospital, Dr. Anil Desai, Secretary, VSPM Academy and President of medical fraternity were present in this inauguration.

Dr. S. M. Gaundwar proposed a vote of thanks. On this occasion, webinar and workshop on Maxillofacial Rehabilitation (Aesthetic Dentistry) by Dr. P. C. Joshi, International Maxillofacial Prosthodontist was telecast at National and International level.

Dr. Ravi Thombare, VVWS Dental College, Amravati and Dr. R. K. Motwani, Professor and Head Dept of Prosthodontics, C.D.C. Rajnandgaon moderated the session.

Dr. Jyoti Mowade, Dr. Anil Chavhanak, Dr. Akhil Kotha, Dr. Pranjali Radke, Dr. Jalsagar Chaudhary and Dr. Anita Kulkarni and almost 1000 students took part in efforts to make this a success.

**“ Occlusion in FULL MOUTH REHABILITATION .”**

CDE program conducted on “ Occlusion in FMR .” on 22/02/2016 in Pride hall vspm dental college Nagpur programme included guest speaker Dr.Moiz Khakiani Full mouth rehabilitation refers to rebuilding or replacing all of the teeth in a patients mouth. Restoration of the form and function of the masticatory apparatus to as near normal as possible. Full mouth rehabilitation should reestablish a state of functional as well as biological efficiency where teeth and their periodontal structures, the muscles of mastication , and TMJ mechanism all function together in synchronous harmony. Restoration of occlusion in patients with severely worn dentition is a challenging situation as every case is unique in itself. The knowledge enlighten was useful for the upcoming student and post graduates as well The event grabed attention of around 30 students and also faculties.

# Spl microscopes expand scope of dental surgery

Payal.Gwalani@timesgroup.com

Nagpur: Until a few years ago, dentists had to send back patients coming for some procedures. However, with the introduction of specially designed microscopes, most of these procedures can be done. It has also allowed the doctors to make dentistry minimally invasive and holistic.

Staff and students of VSPM Dental College and Research Centre were trained in the use of this microscope in a workshop at the institute. It was attended by several students from all over the country. Dr Vivek Hegde from Pune, Dr V Gopikrishna from Chennai and Dr Sanjay Miglani from New Delhi were the faculty. A centre of excellence in endodontics was also inaugurated on the occasion.

"Surgeries have two major requirements—magnification and illumination. Earlier, certain procedures had to be done with the help of mirrors and the surgeon had to depend on tactile movements. This meant that sometimes even the tip of the instrument was not visible to the surgeon. Microscopes were then modified to be used for dental surgeries but now they are specially designed," said Dr Hegde, who is also the director of Indian Endodontic Board (IEB). He said the customized microscope with inclinable tubes made it easier to work in an area that was highly mobile and minuscule.

Dr Hegde added that the procedure was better for the doctors as well. "We are used to bend over for performing all the procedures which causes back and neck problems for dentists. Microsurgeries can be performed sitting down and are much more ergonomic," he said.

Dr Gopikrishna, general secretary of IEB, said that though microsurgery was being used for almost two decades in other countries, the first batch of Indian dentists began learning it only in 2005.

The board recommends that the colleges include it in their curriculum but most of them don't. Since there are no trained teachers in most colleges, it has not been possible so far. With efforts of individuals and organizations, I see the surgery becoming more commonplace

## ADVANTAGES OF MICROSURGERIES

- Improves visual input, so surgeons don't have to depend on tactile movements or perform blind surgeries
- Custom designed microscope with inclinable binocular tubes as opposed to the inclined microscope used in other areas of medicine is more flexible. It helps get access to a lot of difficult to reach areas
- Helps perform several procedures that were not possible earlier
- Helps take a more holistic and conservative approach rather than drilling
- More precise, accurate and better quality procedures as magnification can be 5 to 20 times
- Reduces the post-operation healing time

## Advanced endodontics facility at VSPM College

The centre of excellence for advanced endodontics was inaugurated at VSPM Dental College on Thursday. It will enable the hospital to provide several procedures that were not possible to perform earlier at an affordable price. It will conduct research and training activities as well.

Head of the conservative dentistry department Dr Pratima Shenoi said that it would also be possible to train students and professionals in the region and provide affordable treatment to people

in India," he said. He added that a treatment done using microscope was so precise it could last a lifetime.

The treatments could be improved a lot with the use of microscope surgeries. Dr Pratima Shenoi, head of the conservative dentistry department of the VSPM Dental College & Research Centre, Bignoli Hills, Hingna Road, Nagpur-440019 said, "In many treatments we couldn't provide earlier. It would also help us train students and professionals from the region," she said.

# Laser dentistry: A painless, bloodless option for dental probs

Payal.Gwalani@timesgroup.com

Nagpur: What makes most of us mortally afraid of visiting the dentist? Instruments like drills, wrenches and chisels going inside the mouth, most would say. A modern branch of dentistry— known as laser dentistry— that doctors say is nothing short of miracle, can do away with most of these frightening equipment and still cure dental ailments better.

A webinar 'Lasers in Dentistry' was organized by the department of conservative dentistry and endodontics, VSPM Dental College and Research Centre recently. Vice dean of MA Rangooiwala Dental College, Pune, who is also president of the Society of Laser Application (SOLA), Vienna Dr Vivek Hegde was the faculty. Being webcast in real time, the seminar was attended not only by Indian students from several cities but also by students and dentists from several other countries.

"The use of lasers in dentistry is a pretty recent thing, having been around only for 20 years and in India for only 10 years. It started first for sports physiotherapy, then orthopedics before being introduced to dentistry. There are so many advantages of the technology that I wish all cities had at least some dentists practising it. It is minimally invasive, bloodless, painless, drugless and a highly steril-

There are doctors in Europe, who choose to specialize in laser dentistry. In India, the high treatment and equipment costs are a deterrent for many practitioners

Dr Vivek Hegde, dentist

ized process," said Dr Hegde. In some cases, there was no need for needles, which along with the amount of heat used in the grinders, dored the possibilities of infections, he mentioned.

It is becoming more popular and acceptable among patients as well as dentists to utilize lasers, for their advantages. Therefore, we wanted our students to know more about its scope. We also already have a soft tissue

laser service in our department, and soon plan to bring in some more laser-based services," said Dr Pratima Shenoi, head of VSPM Dental College's department of conservative dentistry and endodontics, about the reason for organizing the CDE on the topic.

She said several persistent and common problems could be treated using laser technology, including removal of decay, root canal treatments and sensitivity. Despite being a relatively new technique, its usage had been expanded in diagnosis, enhancing aesthetics, preventive measures, endodontics, periodontics and maxillofacial surgeries, the doctor added.

"The healing after a process has been done using lasers is miraculously fast. For patients suffering from diseases like heart or kidney ailments or those whose immunity is low due to some reason can still undergo several procedures using lasers," informed Dr Hegde.

He insists, though, that laser technology may not completely replace traditional dentistry. "It is to be used as supportive therapy as an added advantage for patients. There are doctors in Europe though, who use lasers as a complete replacement for traditional dentistry. However, in India, the use of lasers is still in its early stages and there is a need for more research and training for many practitioners," he said.
